

It's the first week of Camp Save-a-Watt, and we're excited to have campers ready to learn! This week, we're visiting Electricity Lodge and learning more about electricity. Electricity is the flow of tiny particles called electrons and neutrons. We use electricity every day!

Color and circle the campsite items that use electricity.  
Draw an X over the campsite items that do not use electricity.

It is important to conserve electricity to spend less money and use less resources.

What does conserve mean? Fill in the blanks below with the missing vowels to identify another word for conserve.
